Now that we have an idea of how much you think it costs to get
Internet service at home, we would like to get a better idea of
why you do not currently have Internet service at home.

The next few questions have to do with various reasons why people
do not have Internet service at home.

Some people say that they just are not interested in using the
Internet at all. Would you say that you are simply not interested
in using the Internet under any circumstances?
